

IT #C Developer

Veolia Belgium/ Luxembourg

In order to reinforce our IT Team, we are looking for a full stack #C Developer.

RESPONSIBILITIES

We are looking for a full stack C# developer responsible for building applications.

Your primary responsibilities will be to design, develop and maintain these applications within a team of developers or solo.

Your main tasks will be:

- Translate user stories, requirements, ideas into functional applications
- Design, build, and maintain efficient, reusable, and reliable C# code
- Identify and solve bugs
- Second line support for bigger issues

YOUR PROFILE

- You have a Bachelor or Master Degree
- You have min 3 years experience in a similar role
- You are Dutch or French speaker and are willing to learn the other language
- You are client and result oriented
- You are eager to learn and stress resistant

Technical skills:

- Proficient in C#, with a good knowledge of its ecosystems
- Familiarity with the .NET framework
- Good knowledge of Microsoft SQL Server and related services SSIS, SSRS
- Creating database schemas that represent and support business processes
- Experience with popular web application frameworks, such as MVC
- Familiarity with Windows Communication Framework
- Implementing unit tests
- Understanding of code versioning tools such as Gitlab
- Experience with or eager to acquire knowledge of cloud environments, serverless, cloud functions on AWS or GCP.
