

Junior System Engineer

Veolia Belgium/ Luxembourg

We are looking for a **System Engineer** to help build out, maintain, and troubleshoot our rapidly changing infrastructure. The system Engineer will be part of a talented team of engineers that demonstrate superb technical competency, delivering mission critical infrastructure and ensuring the highest levels of availability, performance and security. Qualified systems engineers will have a background in IT, computer systems engineering, or systems engineering and analysis.

YOUR ROLE

- Manage and monitor all installed systems and infrastructure
- Install, configure, test and maintain operating systems, application software and system management tools
- Proactively ensure the highest levels of systems and infrastructure availability
- Monitor and test application performance for potential bottlenecks, identify possible solutions, and work with developers to implement those fixes
- Maintain security, backup, and redundancy strategies
- Write and maintain custom scripts to increase system efficiency and lower the human intervention time on any tasks
- Participate in the design of information and operational support systems
- Provide 2nd and 3rd level support
- Liaise with vendors and other IT personnel for problem resolution

YOUR TECHNICAL SKILLS

- Installing, configuring and troubleshooting Windows/Linux based environments.
- Administration and performance tuning of applications.
- Cloud experience, preferably in AWS and GCP
- Experience with virtualization and containerization (e.g., VMware)
- Experience with monitoring systems
- Experience with automation software
- Solid scripting skills (e.g., shell scripts, Python)
- Solid networking knowledge (OSI network layers, TCP/IP)

ABOUT YOU

- You are a dynamic and solution driven person.
- You can work autonomous, but you work well in a team.
- You have experience in managing projects and monitoring deadlines

Are you our new colleague? Apply now : jobs.be@veolia.com
